Dylan Fox

I will be creating a personal information site that is primarily meant for employers to see who I am and what I have done.

This will be an informational site that includes a home page, an about me page, and a contact page. The home page will have things like my resume and experiences I have had relevant to my career. The about me page will be solely for employers to get to know about me on a personal level. Lastly, the contact page will be used for anyone who is viewing the site to get in contact with me for further information or questions.

Personas:

- Web Design Professionals
- Information Technology Professionals
- Future Employers

Comps:

- Other personal resume sites
- Student portfolios
